

MULTISELECTOR 4X
Four in, to one out.
bidirectional switcher.

The new standard in high performance switching.

new product

MULTISELECTOR PRO 4x1 Instrument Switcher

WT2000
Chromatic Tuner
(not included).

The MultiSelector PRO is a state of the art unidirectional 4-to-1 instrument switcher incorporating innovative features sought after by touring professionals. The MultiSelector PRO allows selection of any 1 of 4 inputs to a single output. Each of the four inputs is electronically buffered with a 1 MegOhm input impedance which emulates a proper amplifier load and prevents any

degradation to the instrument's tone. Signals pass through the MultiSelector PRO transparently, with no coloration and the digitally controlled optical switching is completely silent. We've also included a tuner output on the front and rear. All three non-active inputs are routed to the tuner outputs so a guitar tech can tune any instrument in a non active channel without unplugging it.

new product

MULTISELECTOR AMP 1x4 Amplifier Switcher

The MultiSelector AMP is a state of the art unidirectional 1-to-4 instrument amp switcher that silently switches one instrument to multiple amps, with complete isolation between amplifiers. The input is electronically buffered with a 1MegOhm input imped-

ance, which emulates a proper amplifier load and prevents any degradation to the instrument's tone. The signal passes through the MultiSelector AMP transparently, with no coloration and the digitally controlled optical switching is completely silent.

MULTISELECTOR REMOTE

The optional MultiSelector REMOTE "stomp box" style footswitches contains four switches that remotely control the switching functions of the rack mount units using a regular 3-pin XLR microphone cable. A unique, proprietary communication protocol ensures reliable switching with mic cables up to 100 feet long.

The Legendary
SELECTOR A/B BOX

PRO4XR remote works with the MultiSelector PRO and 4X only. MLTSELAMP remote works with the MultiSelector AMP only.
